All-Natural Formula
For All Hair Types

Rejuve3 Scalp Protecting Mist is a non-irritating topical application for use on the scalp between hair washes to remove dirt, oil and odor without the need to shampoo. This non-greasy mist is left on the scalp until the hair is next washed, allowing it to have an ongoing effect.

How It Works

Astringent-based antibacterial agents effectively close hair follicles to prevent bacterial growth on the scalp, ensuring micro-pollutants do not penetrate below the scalp surface. To strengthen, nourish and protect the scalp it is further enforced with essential vitamins including:

- **Biotin:** Imparts vitality and new hair growth; improves the quality of exhausted, fragile hair and neutralizes metabolic by-products that inhibit hair growth
- **Vitamin B6:** Imparts antibacterial and antioxidant scalp benefits, while stimulating blood circulation to the scalp
- **Siloxane:** Imparts maximum hair shine
- **Phytantriol (Vitamin B5 catalyst):** Protects against physical & chemical damage, thermal stress and split ends

Ideal For:

- Eliminating scalp bacteria between washes
- Minimizing potential for bothersome scalp conditions
- Maximum protection from heat applications
- Nourishing scalp to promote healthy hair growth

“ **We have made a legendary chemical-free formula long trusted by dermatologists now available to you** ”
